Climatic Conditions

The 2011 vintage was influenced by an inversed climate: a very dry and warm spring followed by a rather humid and cool summer. Patience and controlled risk-taking produced perfectly ripe grapes from every plot.

Ripening phases

Flowering: 25th May
Véraison (colour change in berries) : Sauvignon Blanc 20th July, Sémillon 30th July

Harvest

Sauvignon Blanc : 12th to 19th September
Sémillon: 14th September to 14th October

Yields

9.40 hl / ha

Winemaking

This vintage was harvested remarkably early. The pickers rapidly selected botrytised grapes with just two passages through the vineyard. The grapes were fermented in French oak barrels in a temperature controlled winery. The wine then is matured for 18 months in the barrels, with 40% new barrels being used for this vintage.

Production

33 600 bottles

The blend

90% Sémillon / 10% Sauvignon Blanc

Tasting notes

The 2011 vintage shows good balance between freshness and opulence. The noble rot left the fruit of the grapes intact. On-the-vine selections of botrytised grapes were concentrated in a short spell of time, creating a powerful well-balanced wine with aromatic finesse.
